HOLD maintained; TP: MYR0.54

We believe that MNHB's group net loss will continue to narrow in 4QFY23 and that it is on track to turn profitable in FY24E given improved store operations and internal cost efficiencies conducted throughout FY23. We make no changes to our earnings estimates. Maintain HOLD with an unchanged TP of MYR0.54 (based on 1.7x FY24E PBV).

Improvements in store footfall and product offering

At MNHB's 3QFY23 results briefing, management shared that positive revenue growth YoY and QoQ may be attributed mainly to higher overall store footfall, the streamlining of CU store SKUs, and better limited fresh food product launches which saw a continuous flow of customers with each campaign (eg. Choco Dino collaboration with MILO). Note that fresh food sales accounted for c.60% of CU store revenue but a lower c.10% sales contribution to Mynews stores.

CU stores could break-even within the next 6 months

Recall that MNHB put its aggressive CU store opening plans on hold in FY23 (132 stores as at end-3QFY23). This was to enable MNHB to focus on repositioning its fresh food product offering after collecting adequate customer sales data post-pandemic. Internal cost efficiencies (est. MYR250k-MYR300k/quarter) could also arise after the group has successfully merged overlapping teams (eg. merchandising, marketing etc.) for both its Mynews and CU store operations.

Restarting its store expansion plans in FY24

MNHB targets to open 100 new stores in FY24 (9MFY23: +20 stores YoY). We believe the bulk of new stores will be opened under its Mynews brand while new CU stores will only be opened in strategic locations. The group will also be prioritising the inclusion of differentiated fresh food and RTE products into its Mynews stores to align to changing consumer behaviours.

Company Description

Mynews's principal business activity is press and convenience retailing.

Business Model & Industry Issues

- The ESG pressure faced by convenience stores mainly emanates from its usage of single-use plastic bags and other plastic materials in its food product packaging. Enhanced Government regulations have led to a decline in MNHB's overall plastic usage per retail transaction but more needs to be done to assimilate biodegradable plastics in its food product packaging, especially ones that are manufactured in-house.
- Food wastage is another area that requires attention given MNHB's foray into food manufacturing in 2019. Unsold third-party supplied food products are returnable but the group has yet to determine sustainable means of disposing its in-house manufactured food products at this juncture.
- In summary, MNHB's current ESG disclosure is brief and the group has not committed to any concrete targets nor has it publicised any comprehensive sustainability framework. Once MNHB shares more details of its sustainability goals, this could strengthen its brand perception to both customers and investors alike.

Material E issues

- Following the launch of Malaysia's "Roadmap Towards Zero-Single Use Plastics 2018-2030", the number of sales transactions that used plastic bags made up 6% of MNHB's total number of sales transactions in 2021 (2020: 7%) mainly due to the surcharge on plastic bags & straws for customers.
- In 2022, 90% of the plastic bags used throughout MNHB's operations are biodegradable.
- Food products offered at its CVS' are returnable to its third-party suppliers. That said, MNHB is still exploring ways for safe disposal of its in-house manufactured food items (eg. engaging food recycling company, process food wastage into animal feed/organic fertiliser).
- MNHB is progressively reducing its energy consumption by installing LED lights in all its new and existing convenience stores (CVS). To date, 70% of its CVS' use LED lights.

Material S issues

- In FY22, MNHB employed 2,729 employees with a male: female ratio of 54:46 (from 61:39 in 2017). MNHB's foreign workers represent 19% of its workforce.
- The group's third-party suppliers are required to adhere to high standards of food safety. MNHB ensures its suppliers are credible in terms of product quality and food handling before they are taken on board.
- Through Mynews Cares, MNHB runs a programme ("Allowance That Allow") that converts loose change collected from donation boxes at its CVS outlets, into allowances for underprivileged students

Key G metrics and issues

- In 2022, MNHB's board comprised 7 directors: 4 Independent non-executive directors, 2 executive directors and 1 executive chairman.
- The 2 executive directors on the board are siblings. Both executive directors have indirect interest in MNHB through group's major shareholder, D&D Consolidated Sdn Bhd (57.4% shareholding).
- As at end-FY22, there are only 2 women on MNHB's board (29% representation).
- The chairman of the board and the group CEO positions are held by separate individuals.
- Annual shareholders' approval is required for independent directors serving beyond 9 years. At the moment, no Directors have served as an Independent Director for more than 9 years.
- The group CEO's total remuneration package was MYR0.8m against MNHB's pre-tax loss in 2022.
- MNHB does not disclose the remuneration packages of its senior management due to confidentiality reasons.
- The group maintains a policy that requires a former key audit partner to observe a cooling-off period of at least 2 years before being appointed as a member of the audit committee. At present, the members of the Board were not former key audit partners.
- MNHB has been audited by Grant Thornton Malaysia PLT since 2016.
In 2018, MNHB entered into a related party transaction to dispose 2 units of property for MYR3.4m, to the sons of a non-independent non-executive director. Aside from this, the group is also required to enter into recurring related party transactions involving various parts of their food manufacturing business for its day-to-day operations.

Risk statement

There are several risk factors for our earnings estimates, price target, and rating for MNHB. Poor execution or inability to find suitable store locations could hinder new store openings and revenue growth. Additionally, slower consumption demand growth could result in falling same store sales growth. Higher operating expenses from higher minimum wage and higher rental could also adversely impact earnings.

Appendix I

Methodology of our proprietary ESG scoring methodology.

We evaluate the ESG ratings based on quantitative, qualitative and ESG targets. We assign a score for each of these three parameters. The overall rating is based on the weighted average of the scores: quantitative (50%), qualitative (25%) and ESG target (25%).

For the quantitative, qualitative and ESG target, the sub-parameters are assigned a score - '0' for data not available, '+1' for improving trajectory, positive change, 'Yes', better than peers or a positive number if historical is not available and '-1' for declining trajectory, negative change, 'No', lower than peers or a negative number. The total of the scores of all the sub-parameters is divided by the total number of sub-parameters, to derive the score of each of the three parameters.

The sub-parameters may be different for different industries depending on the key areas to monitor for each industry. A company should achieve a minimum score of 50 for an average ESG rating
