New USD110m order - Buy on dips

Maintain BUY with SGD0.65 TP

CSE has secured 2 major contracts worth USD110.2m for the design and manufacturing of power distribution centres slated for execution from 2024 to 2025. Moreover, last night (30 Oct), US President Joe Biden approved USD1.3bn to build three new interstate power lines which we believe will benefit CSE. CSE remains our Top Pick in the SMIDs space and, in our view, the recent share price dip represents an attractive buying opportunity. Maintain BUY with a SDG0.65 TP based on 15.5x FY24E P/E.

2 major contracts worth USD110.2m

CSE on 17 Oct won 2 major contracts worth USD110.2m in the US slated for execution between 2024 and 2025. Both contracts are for the design and manufacture of power distribution centres, as well as the integration of complex electrical and control systems and equipment in the US. CSE's order book hit an all-time high of SGD521.8m as at 30 Jun 2023. YTD, CSE have secured approximately SGD675.7m of orders.

Huge potential in electrification globally; esp. US

On Monday night, US President Biden approved USD1.3bn to build three new interstate power lines in an effort to upgrade the outdated electric grid. The drive toward electrification also means the US needs to "more than double our grid capacity", US Energy Secretary Jennifer Granholm said on Monday. We believe CSE will be a key beneficiary due to its expertise in electrification solutions which will be key to securing US infrastructure projects and breaking into segments like data, and battery storage centres. We expect the US contribution to grow significantly in the next 2-3 years by 100-200%.

Dip represents buying opportunity - SMID Top Pick

CSE offers a unique opportunity to ride the upcycle in attractive growth areas, accompanied by a sustainable 7.0% dividend yield. We believe the recent market weakness represents an attractive buying opportunity. CSE remains our Top Pick in the SMID space.

Business Model & Industry Issues

- As a global multi-sector systems integrator CSE Global has more room for growth in terms of its sustainability strategies, as such the group has placed great emphasis on its plans to protect the environment moving forward. Using TCFD roadmaps to help reduce their carbon emissions and plans to utilise Sustainability Linked Loans.
- CSE has been hard at work pushing for digitalisation by reducing its paper consumption index to 12.9 (kg/SGD m)2 in FY2022 as compared to 76.6 (kg / SGD million)2 in FY2020 base year.
- CSE currently has a healthy gearing level of 34.0% with adequate headroom for working capital requirements. With a healthy orderbook along with stringent supplier evaluation and screening to select key suppliers to produce the best quality service and product. With that its customer satisfaction index has seen a return to 82% in FY22 as compared to 75% in FY21.
- The biggest risk would be supply chain disruptions to CSE Global as it is dependent of the movement of goods and services in the global supply chain. Another risk would be its plans to reduce emissions as currently targets are still far away from actual emissions. However, the group is actively formulating means to reduce emissions and drive for more sustainable growth.

Material E issues

- CSE Global plans to measure its Scope 3 emissions and plans to hit its long-term target of reducing greenhouse gas carbon emissions.
- Financing wise, CSE Global is negotiating with banks for possible Sustainability Linked Loans (SLL).
- Currently FY22 targets of reducing carbon emissions have not been met, this has occurred for the past few years. However, paper consumption index of the company has been consistently decreasing. CSE Global is also planning to disclose its Task Force on Climate-Related Financial discussion roadmap as part of an effort to drive climate action.

Material S issues

- The company recognises that its employees are its greatest asset and have put in ample effort to diversify and create an inclusive environment. As such new hire rates stand at 30% and the turnover rates at 27% as at end-2022.
- Additionally, CSE adopts flexible work arrangements for its employees, but more work can be done in terms of increasing workplace gender diversity and training hours for employees.
- In 2022, CSE donated SGD5, 000 to Yellow Ribbon Singapore to support and help inmates and ex-offenders rebuild their lives and lower the recidivism rate through skills and longterm career development. CSE continues to invest in the development of employees and granted a total of 30 bursaries to its Singapore employees to further their studies at various higher learning institutions in Singapore.

Key G metrics and issues

- The board has 8 directors, including the Executive Chairman, the CEO and 7 non-executive directors, of which all are independent.
- 25% of the board are females, which demonstrates a decent level of diversity.
- Management has also implemented a whistle-blowing policy that ensures there is a safe and confidential avenue for employees and external persons to communicate and lodge an alleged incident.
- CSE conducts a Risk Assessment and Control Self-Assessment exercise which entails the identification, assessment and documentation of material risks and corresponding internal controls. Such material risks include fraud and corruption, environmental, health and safety, and human capital risks which are ESG-relevant. In FY2022, the company recorded zero confirmed incidents relating to corruption. CSE has a zero-tolerance stance against fraud, bribery and corruption.
- CSE is planning to conduct climate-related training for all Board Members and Management Team to help bolster and minimise their environmental footprint and achieve resource efficiency. However, this can be fleshed out more and more work can be done in terms of being a part of a climate action committee.
