

My EG Services (MYEG MK)

Expands ZTrade coverage scope

New monetisation stream; maintain BUY

The introduction of verification services for China-issued Certificates of Origin (COOs) effectively expands MYEG’s monetisation avenues for its thriving blockchain segment. We maintain our FY24-26E earnings forecasts for MYEG and our TP of MYR1.68 (pegged to 20x FY25E PER, at LT Mean). MYEG is one of our top picks in the M’sia software space. Reiterate BUY.

COO verification now a two-way street on ZTrade

On 12 July, MYEG announced that ZTrade, an app built in-house on its Tier-1 Zetrix blockchain platform is expanding its scope of coverage to now include verification of COOs issued by the Chinese customs authority (GACC). ZTrade is MYEG’s cross-border trade facilitation platform that was officially launched on 27 June after months of pilot testing. The platform enables the digitalisation of trade clearance and tariff computation to cut processing time by up to 50%. When launched, ZTrade’s coverage scope was limited to the verification of digital COOs issued by the M’sian customs authority, mandatory for all outbound trade of local goods to China.

MYEG to benefit from Malaysia-China trade growth

The latest announcement effectively completes two-way coverage for the verification of COOs in relation to the trading of goods between Malaysia and China. For outbound trade to China, we understand that each COO is priced at CNY200 (c.MYR130), with the option for a bundle plan (5 COs at CNY750) also available to Malaysian exporters. China has been Malaysia’s largest export partner for 15 consecutive years and accounted for the lion’s share of Malaysia’s cross-border trade in 2023 at 17%. Malaysia’s exports to China last year totaled MYR192.1b (-9% YoY).

ZTrade’s margins comparable to Zetrix tokens

We have yet to impute for potential earnings accretion from ZTrade into our forecasts, as cross-border trade volume is harder to ascertain (vs. publicly available trade value statistics). Similar to its other blockchain segment product offering (sale of Zetrix tokens), we expect MYEG’s ZTrade’s net operating margins to be >c.95%. Zetrix token sales alone (ASP assumption: USD15/token) is expected to contribute c.MYR270m to MYEG’s turnover in FY24E, which we have imputed into our forecasts.

Risk Statement

There are several risk factors that could negatively impact our earnings forecasts, target price and recommendation on MyEG Services. These include prolonged unresolved foreign worker recruitment into Malaysia, higher-than-expected capital expenditure required to further develop the Zetrix blockchain infrastructure, as well as discontinuity of its concession with the government to provide e-government IT services.
