# Singapore Telecommunications (ST SP) A defensive shield

#### Developed market telcos outshine amid uncertainty

YTD, Singtel has outperformed its ASEAN peers and the local STI index by 23%. However, Singtel's YTD performance is relatively inline with global developed market (DM) telcos (up 14% YTD) which outperformed the global MSCI index by 19ppt. DM telco's defensive characteristics amid tariff/macro uncertainty and safe haven flows are tailwinds. Despite outperformance, we note that Singtel still has a >25% holdco discount while its 16% NPAT growth outlook and higher capital return potential (on top of 5% yield) remain upside catalysts. We reiterate our BUY on Singtel and raise our SoTP-based TP to SGD3.96, factoring in Bharti's current market cap and the lift in our AIS and Optus valuations.

#### 4Q/2H FY25 preview: firm delivery

We expect Singtel to deliver 15% YoY/10% HoH earnings growth in 2HFY25 (results due late May). Growth is supported by associate PBT (up 18% YoY/15% HoH), Optus EBIT growth (up 53% YoY/1% HoH) and NCS EBIT growth (up 44% YoY/1% HoH). This is partially offset by forex weakness and Singapore mobile. Within the core business, we see Optus remains on a solid footing as it prepares to raise prepaid pricing 7-13% from 28 April (Figure 3) while overall competition remains relatively benign. Within associates, Bharti and AIS remain on solid footing and we expect 2H PBT contribution to rise 55% YoY and 29% YoY, respectively. Singapore mobile remains a concern with service revenues expected to decline 3% YoY.

# Singapore competition a challenge but product and geographical diversification help Singtel

Our Singapore consumer survey shows strong preference for lower mobile spend and low-cost operators like Simba/MVNOs. Competitive pressure is likely to persist even if the industry undergoes consolidation with Simba prioritizing share gains. That said, the impact of elevated competition on Singtel remains relatively muted as only 12-13% of group revenue is from the Singapore consumer while contribution to Singtel's SoTP is <5%.

#### Solid yield and potential capital return

Despite tariff vagaries leading to macro uncertainty, Singtel's utility like cashflows remain defensive. Backed by a solid 1.6x net debt to EBITDA balance sheet, we see limited risk to Singtel's dividend outlook of SGD16.6-20.2cts, leading to a 5% dividend yield. Singtel guided capital recycling initiatives of SGD6b which positions it as a capital return candidate with a solid and defensive dividend yield.

## **Business Model & Industry Issues**

- Singtel is most exposed to cybersecurity and personal data leakage risks given its nature of business. There have been major data breaches at Optus due to IT, process and human errors over the years, and Singtel was penalised for an immaterial sum.
- Going forward, Singtel will continue to educate its staff and improve practices and processes to minimise data breaches.
- As Singtel is in the business of connectivity, it is supporting digital inclusion through connecting communities and supporting the disadvantaged.
- Notably in FY20, the telco supported migrant workers with free remittance services and their WiFi and mobile data needs. It
  also provided refurbished laptops and data SIMs to disadvantaged students for their home-based learning. In Australia, Optus
  scaled up "Donate Your Data" to support disadvantaged students by offering them free mobile data access for online learning.
- Singtel displays no exceptional risks for a telco operator for ESG and is in line with peers in tackling ESG issues.

- Completed a comprehensive review of the SBTi target for revalidation with the support of all business units and brought forward net-zero goal to 2045.

## **Material S issues**

- 31% of female employees in middle and top management.
- Recognised by the 2023 Bloomberg Gender Equality Index for the fifth consecutive year.

- Key management compensation accounted for 0.6% of total employee compensation and 0.8% of group net profit in FY23.
- There have been no corruption cases reported for the past three years.
- Cyber security and data leakage risks. Conducts its businesses in strict adherence to data protection laws - the Personal Data Protection Act in Singapore and the Privacy Act and Telecommunications Act in Australia.

#### Reminder

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct its own analysis of the product and consult with its own professional advisers as to the risks involved in making such a purchase.
