Inari Amertron (INRI MK)

Bold move, eyes on execution

Inari partners with Sanan to acquire Lumileds

Inari has announced that it has partnered Sanan Optoelectronics to jointly acquire 100% of Lumileds Int'l, a global LED solutions provider at USD280m (c.MYR1.2bn). The investment will be funded via existing private placement proceeds, with transaction completion by March 2026. We see strategic merit in diversifying beyond RF into the LED space but remain cautious given the limited earnings visibility and integration risks. We maintain forecasts and lift TP to MYR2.14 from MYR2.00 (23x CY26E PER; -1SD to 5Y fwd. Mean), maintain HOLD. Analyst coverage is transferred to Lucas Sim from Anand Pathmakanthan.

Deal structure and background

The acquisition will be made via a Hong Kong-incorporated SPV, which will acquire 100% of Lumileds Holding B.V. and its global subsidiaries. Sanan will hold 74.5% and Inari 25.5%. Inari's MYR307m capital injection will be fully funded by proceeds from its July 2021 private placement. Inari's cash stood at MYR2.1bn as of March 2025 with zero borrowings. The total investment of USD280m (c.MYR1.2bn), including working capital, reflects a slight discount to Lumileds' appraised value of USD287m. The proposed acquisition is expected to be completed by March 2026.

Diversification efforts acknowledged

We view this as a strategic pivot for Inari to diversify its revenue streams beyond RF, leveraging Lumileds' established global presence in the LED markets. While details of the business strategy with Sanan are still being finalised, Inari is expected to take on a key role in Lumileds' full back-end assembly operations in Penang. This could enhance Lumileds' operational scale and shift it away from a loss-making position.

Maintain HOLD at MYR2.14 TP

We are mindful that the JV acquisition has limited earnings visibility and could pose integration risks. The transaction is financially neutral in the near term, in our view. Our forecasts are maintained pending further clarity from management but lift TP to MYR2.14 (from MYR2.00) based on CY26E EPS at an unchanged 23x PE multiple (-1SD to 5Y fwd Mean).

Risk statement

There are several risk factors for our earnings estimates, target price and rating for Inari. A sharp downturn in the global markets for electronics, especially smartphones, will affect the demand for components that Inari produces for its key clients (i.e. Broadcom and OSRAM). Design-in and design-out of components related to Inari's current production will also affect revenue and earnings. Additionally, forex volatility, especially USD/MYR, will affect Inari's earnings, as >95% of its revenue and c.50% of its COGS are USD-denominated.
